Introduction to the Frederick Allen Journal Project **Westport Historical Society**

By a fortuitous chain of events, an old journal returned to Westport, Massachusetts. It is the journal of Frederick Allen (1819-1874), who apparently lived his whole life on Hixbridge Road, where the Buzzard's Bay Brewery is today. For 59 months from early June 1833 through the end of April 1838 he kept a journal almost daily. For the first 47 of those months he lived the life of a young, unmarried Westport farmer and recorded the wind and weather and his various activities of work and play. For the last 12 months of the journal he shipped out of Westport Point and went a-whaling and recorded his trip around the Atlantic Ocean. The last entry in his journal is the day he returned to Westport.

The journal came back to Westport via Richard Donnelly, an antiquarian from Barrington, Rhode Island who specializes in whaling journals, among other things. He bought the journal, studied it intensely, and gave a presentation on it to the Westport Historical Society (WHS) in 2015, which is still available on the Society's website, or at this link on YouTube: <https://youtu.be/q6jrYv1CbG8>. In his talk he discussed Frederick's life in Westport as a young man, the chores he undertook on his father's farm, the various religious meetings he attended, and his socializing with both young men and women, usually in the evening. But something appeared to be missing in his life – adventure. So, what option did a young Westport farmer have? That's where the whaling came in, and Mr. Donnelly discussed that in detail.

In 1835, Frederick's father Major Allen decided to build a new house. He had a family of four, with his wife Molly, his daughter Charlotte, and son Frederick, and must have thought the family needed more space. Thus, Major Allen tore down their existing house that had been built in 1709 and contracted with his brother John Allen for the new construction. Frederick was actively involved, lending his father money for the building and actually helping to build it. The finished house was in fine Georgian style and existed at its Hixbridge Road site until very recent memory, when it was lovingly dismantled piece by piece by Dora & Tripp Milliken of Westport and re-assembled on their property off Main Road. The Milliken's also bought the journal from Mr. Donnelly and own it to this day.

As referred to above, Frederick's journal covers about four years of farming and about one year of whaling. It was the whaling that has attracted the most interest to date. However, the WHS' Executive Director Jenny O'Neill notes that there are plenty of whaling journals around but very little on Westport farming in the 1830's. For that reason, we want to focus first and foremost on Frederick's life as a young farmer.

My involvement with Frederick's journal began in early 2019. I had discussed doing a history research project with Jenny during 2018, noting that my only degree in the world was in history (BA, Maryland University, 1973). So, Jenny pitched a project to me: the

transcription of the journal from handwriting to Word document. Luckily, I did not have to start from scratch. Several editors had already transcribed large sections of the journal, and they are Evelyn Wilbur, Joanne Demarco, Barbara Marcotte, Betsy Wojtowicz, and Anne Lowell. I give them considerable credit for their work. Another not so insignificant stroke of luck is that Frederick's handwriting was actually very good. And finally, I worked on the journal from time to time during 2019 but when the pandemic hit in March 2020 and sheltering at home became the norm, I had plenty of time to finish up the transcription. Does the pandemic have any silver linings? Well yes, and here is one of them.

Jenny and I have developed a plan for this Fall. We want to circulate the transcribed Frederick Allen journal to local historians and other interested parties for their input. Readers will note that the transcription, while largely complete, still has a number of small gaps. Sometimes Frederick's otherwise excellent handwriting descends into the illegible. Sometimes he uses early 19th century words that we do not know and occasionally his spelling is incomprehensible. Accordingly, we plan to circulate the journal the week of October 5, 2020 for feedback during the rest of the month and into November. On Saturday, November 14, 2020 at 2:00 pm we tentatively plan to hold a public Zoom meeting to discuss the journal and to invite further public feedback.

That's it for now and welcome to the project!

Frederick Allen Journal Project
Westport Historical Society
Fact List

Frederick Allen - tall. Frederick was a 19th century Westport farmer who went whaling. As far as we know, he lived his whole life at 98 Horseneck Road in Westport, Massachusetts, except while whaling. According to his Protection Papers that he took out just before his whaling adventure, Frederick was 6'2½" tall with brown hair, dark complexion and dark eyes.

His Journal – almost five years. Frederick wrote a Journal that covered his daily activities for about 59 months from June 5, 1833 to April 29, 1838. He led the life of a Westport farmer from the beginning of the Journal until April 21, 1837 when he shipped out. The last entry was the day he returned to Westport from whaling.

Vital statistics – lived 64 years. Frederick was born July 28, 1809 and died May 11, 1874 at the age of 64. He died of “lung fever”, perhaps from his use of tobacco. His parents were Major Allen (1778-1859) and Molly Allen (1775-1842). He and Hannah C. Brownell (1817-1910) announced their intended marriage to the Westport Town Clerk on March 20, 1839 and were married on April 3, 1839. They had a son Cortez Allen (1839-1918) and two daughters Charlotte (1843-1864) and Mollie (1852-1881). Hannah outlived Frederick by an astounding 36 years!

Farm work – hard but fruitful. The Allen family farm grew a variety of crops, including corn, potatoes, turnips, cabbages, pumpkins, oats and hay, and Frederick worked hard on the farm. His father kept livestock, including hogs and sheep, and had oxen that they probably used for plowing. Frederick also gathered apples and made cider. He dragged stones to make walls and worked on farm roads. He cut and drew wood for fuel. He owned a sail boat and took advantage of Westport’s bountiful waters by catching a lot of fish with his nets and hooks.

Family house – Hixbridge Road. In 1835 Major Allen built a new house on the family property at 98 Horseneck Road in Westport, replacing a 109-year old house. The 1858 Westport map shows it belonging to “M. Allen”, which we can safely assume was Major Allen. The 1871 map says “F. Allen”, who was certainly Frederick Allen. The 1895 map says “H. Allen”, Frederick’s widow Hannah. The house was carefully dismantled piece by piece c. 2012 and relocated to Main Road in Westport and reassembled by Dora & Tripp Milliken. It serves as their home to this day.

Socializing – evening parties. As a young, unmarried man, Frederick did a lot of socializing with young men and women in his neighborhood. He described many of these evening gatherings as “sprees”, perhaps implying that adult beverages were involved. He never mentioned his eventual wife as attending these gatherings; however, he wrote that he posted a letter to “H.C.B.” (almost certainly Hannah C.

Brownell) while on his whaling voyage, and he probably knew her from his social activities.

Henry Pero – man of color. Frederick made numerous references to “H.P.” This was Henry Pero, a man of color born in 1816. As a baby and young child, he was cared for by Charlotte White, who was paid by the Town to do so. Frederick hired him, fished with him, shot targets with him, but made no mention of socializing with him in the evenings.

Dr. Handy – of Handy House fame. Frederick lived not far from the Handy House and visited Dr. Handy when he got sick, for example with a strep throat. He also ordered a thermometer through the doctor and used it to record temperatures in Fahrenheit in his Journal.

Religion - believer. Frederick was religious and attended frequent talks by a variety of ministers at numerous locations. These meetings were usually not in churches (i.e. in a barn) and usually in the evening. He seems to have been a Christian but did not belong to one church. He went to a baptism of two ladies in the cold waters of the Westport River by a bridge (probably nearby Hixbridge) in January.

Reading – many books. Frederick was quite literate and along with his excellent handwriting he was an avid reader. In the earlier years of his Journal he read such works as the *Working Men’s Prefs.*, Vol. 2, No. 1, Daboll’s *Arithmetic* and a geography book. However, later in the Journal period with whaling increasingly on his mind as he acquired Moore’s *Practical Navigator* and *Bowditch’s Navigator*.

Whaling – adventure of a lifetime. Frederick shipped out on the brig “Mexico” from Westport Point on April 21, 1837. The owner and captain of the ship was Gideon Davis of Westport Point. He first sailed south to the Bahamas, then east across the Atlantic to the Azores, the Canaries, and Cape Verd, then southwest back across the Atlantic below the equator to the Abrahlos Banks off Brazil, then north to the Caribbean, and then back home to Westport. The voyage lasted one year and 11 days. It produced 555 bbls. of sperm oil and 20 bbls. of whale oil. Frederick’s share of the voyage’s revenues was every 65th barrel.

Burial - Westport. Frederick is buried in Beach Grove Cemetery, Westport and he rests in Section C1, Lot 103. Along with Frederick in the same section of the cemetery are the graves of other Allen family members, including his parents, his wife Hannah, and his children Cortez, Charlotte, and Mollie.
